

Morning (Winter)

1. fill food trough from food located in the metal trash can
2. uncover 5-gallon cooler; replace the water bottles with new ones filled with hot water
3. if the water level in the 5-gallon cooler is low, empty the water bottles you just removed into the cooler
4. unlatch the side hatch from inside the coop
5. go outside and open the hatch, securing it open with the carabiner and rope
6. place the wooden plank under the hatch so the chickens can leave the coop
7. check the nesting boxes (and elsewhere!) for eggs and place them in a carton
8. log the date and time of day, number of chickens, and number of eggs collected in the Peeps Notebook. Note any injuries, illness, or anything else that doesn't look quite right.
9. take home your share of eggs; if the weather is very cold (below 25°F), take all of the eggs so they don't freeze. Drop off extras at the Geneva Bicycle Center.
10. close the coop's back door (the human door) and latch it
11. close, latch, and lock the gate when you leave the yard
